Chapter 11 Exam

Integumentary & General Surgery

Name: _____ Date: _____

Score (instructor): _____ / 15

Choose the best answer for each question. Mark one choice per question. Each question is worth 1 point.

1. Which description best matches “Excision diameter”?

[ ] A. A staged, planned, or more extensive related procedure during the postoperative period
[ ] B. Superficial closure involving skin or subcutaneous tissue
[ ] C. The lesion diameter plus the narrowest required margins on both sides
[ ] D. The deepest tissue actually removed during debridement

2. Which description best matches “Benign lesion excision”?

[ ] A. Layered closure or qualifying heavily contaminated wound repair
[ ] B. Removal of a nonmalignant lesion selected by site and total excised diameter
[ ] C. The surface area used with depth to select primary and add-on debridement codes
[ ] D. An unplanned related return to the operating or procedure room during the postoperative period

3. Which description best matches “Malignant lesion excision”?

[ ] A. Removal of a malignant lesion selected by site and total excised diameter
[ ] B. Rearrangement of nearby tissue to close a defect
[ ] C. An unrelated procedure during the postoperative period
[ ] D. Repair requiring work beyond layered closure, such as extensive revision or undermining when documented

4. Which description best matches “Simple repair”?

[ ] A. Transfer of skin to cover a wound or defect
[ ] B. The lesion diameter plus the narrowest required margins on both sides
[ ] C. The deepest tissue actually removed during debridement
[ ] D. Superficial closure involving skin or subcutaneous tissue

5. Which description best matches “Intermediate repair”?

[ ] A. Removal of a nonmalignant lesion selected by site and total excised diameter
[ ] B. The surface area used with depth to select primary and add-on debridement codes
[ ] C. Layered closure or qualifying heavily contaminated wound repair
[ ] D. Removal of tissue for diagnostic examination before definitive treatment

6. Which description best matches “Complex repair”?

[ ] A. Rearrangement of nearby tissue to close a defect

[ ] B. Repair requiring work beyond layered closure, such as extensive revision or undermining when documented

[ ] C. Defined routine preoperative, intraoperative, and postoperative services included with surgery

[ ] D. Removal of a malignant lesion selected by site and total excised diameter

7. Which description best matches “Debridement depth”?

[ ] A. The deepest tissue actually removed during debridement

[ ] B. A staged, planned, or more extensive related procedure during the postoperative period

[ ] C. Superficial closure involving skin or subcutaneous tissue

[ ] D. Transfer of skin to cover a wound or defect

8. Which description best matches “Debridement area”?

[ ] A. An unplanned related return to the operating or procedure room during the postoperative period

[ ] B. Layered closure or qualifying heavily contaminated wound repair

[ ] C. Removal of tissue for diagnostic examination before definitive treatment

[ ] D. The surface area used with depth to select primary and add-on debridement codes

9. Which description best matches “Adjacent tissue transfer”?

[ ] A. Repair requiring work beyond layered closure, such as extensive revision or undermining when documented

[ ] B. Defined routine preoperative, intraoperative, and postoperative services included with surgery

[ ] C. Rearrangement of nearby tissue to close a defect

[ ] D. An unrelated procedure during the postoperative period

10. Which description best matches “Skin graft”?

[ ] A. A staged, planned, or more extensive related procedure during the postoperative period

[ ] B. Transfer of skin to cover a wound or defect

[ ] C. The lesion diameter plus the narrowest required margins on both sides

[ ] D. The deepest tissue actually removed during debridement

11. Which description best matches “Biopsy”?

[ ] A. Removal of tissue for diagnostic examination before definitive treatment

[ ] B. Removal of a nonmalignant lesion selected by site and total excised diameter

[ ] C. The surface area used with depth to select primary and add-on debridement codes

[ ] D. An unplanned related return to the operating or procedure room during the postoperative period

12. Which description best matches “Global surgical package”?

[ ] A. Removal of a malignant lesion selected by site and total excised diameter

[ ] B. Rearrangement of nearby tissue to close a defect

[ ] C. An unrelated procedure during the postoperative period

[ ] D. Defined routine preoperative, intraoperative, and postoperative services included with surgery

13. Which description best matches “Modifier 58”?

[ ] A. Transfer of skin to cover a wound or defect

[ ] B. The lesion diameter plus the narrowest required margins on both sides

[ ] C. A staged, planned, or more extensive related procedure during the postoperative period

[ ] D. Superficial closure involving skin or subcutaneous tissue

14. Which description best matches “Modifier 78”?

[ ] A. Removal of a nonmalignant lesion selected by site and total excised diameter

[ ] B. An unplanned related return to the operating or procedure room during the postoperative period

[ ] C. Layered closure or qualifying heavily contaminated wound repair

[ ] D. Removal of tissue for diagnostic examination before definitive treatment

15. Which description best matches “Modifier 79”?

[ ] A. An unrelated procedure during the postoperative period

[ ] B. Repair requiring work beyond layered closure, such as extensive revision or undermining when documented

[ ] C. Defined routine preoperative, intraoperative, and postoperative services included with surgery

[ ] D. Removal of a malignant lesion selected by site and total excised diameter
