Chapter 8 Exam

Pregnancy, Congenital, Injury & Z Codes

Name: _____ Date: _____

Score (instructor): _____ / 15

Choose the best answer for each question. Mark one choice per question. Each question is worth 1 point.

1. Which description best matches “Obstetric code priority”?

[ ] A. An additional code reported on the maternal record when delivery occurs

[ ] B. Chapter 15 pregnancy codes generally take sequencing priority when a condition complicates pregnancy

[ ] C. The period of active treatment, not necessarily the patient's first visit

[ ] D. Supplemental information describing how, where, and during what activity an injury occurred

2. Which description best matches “Trimester”?

[ ] A. Pregnancy stage determined by completed weeks of gestation

[ ] B. Routine care during healing or recovery after active treatment

[ ] C. A Z code that describes a reason for care such as screening, counseling, or follow-up

[ ] D. A Z38 code used as the principal diagnosis on the newborn birth record

3. Which description best matches “Weeks of gestation”?

[ ] A. A residual effect remaining after the acute phase of an injury or condition

[ ] B. A Z code that describes a status such as device presence, dependence, history, or long-term therapy

[ ] C. A condition present at birth, although it may be diagnosed later

[ ] D. An additional Z code used when applicable to identify the specific completed pregnancy week

4. Which description best matches “Outcome of delivery”?

[ ] A. Chapter 15 pregnancy codes generally take sequencing priority when a condition complicates pregnancy

[ ] B. The period of active treatment, not necessarily the patient's first visit

[ ] C. An additional code reported on the maternal record when delivery occurs

[ ] D. An event involving overdose, wrong substance, wrong route, or medication taken in error

5. Which description best matches “Newborn birth code”?

[ ] A. Routine care during healing or recovery after active treatment

[ ] B. A Z38 code used as the principal diagnosis on the newborn birth record

[ ] C. A reaction occurring when a correctly prescribed drug is properly administered

[ ] D. Pregnancy stage determined by completed weeks of gestation

6. Which description best matches “Congenital anomaly”?

[ ] A. A condition present at birth, although it may be diagnosed later
[ ] B. Taking less medication than prescribed or instructed
[ ] C. An additional Z code used when applicable to identify the specific completed pregnancy week
[ ] D. A residual effect remaining after the acute phase of an injury or condition

7. Which description best matches “Initial injury encounter”?

[ ] A. Supplemental information describing how, where, and during what activity an injury occurred
[ ] B. An additional code reported on the maternal record when delivery occurs
[ ] C. An event involving overdose, wrong substance, wrong route, or medication taken in error
[ ] D. The period of active treatment, not necessarily the patient's first visit

8. Which description best matches “Subsequent injury encounter”?

[ ] A. A Z38 code used as the principal diagnosis on the newborn birth record
[ ] B. A reaction occurring when a correctly prescribed drug is properly administered
[ ] C. Routine care during healing or recovery after active treatment
[ ] D. A Z code that describes a reason for care such as screening, counseling, or follow-up

9. Which description best matches “Sequela”?

[ ] A. Taking less medication than prescribed or instructed
[ ] B. A residual effect remaining after the acute phase of an injury or condition
[ ] C. A Z code that describes a status such as device presence, dependence, history, or long-term therapy
[ ] D. A condition present at birth, although it may be diagnosed later

10. Which description best matches “Poisoning”?

[ ] A. An event involving overdose, wrong substance, wrong route, or medication taken in error
[ ] B. Chapter 15 pregnancy codes generally take sequencing priority when a condition complicates pregnancy
[ ] C. The period of active treatment, not necessarily the patient's first visit
[ ] D. Supplemental information describing how, where, and during what activity an injury occurred

11. Which description best matches “Adverse effect”?

[ ] A. Pregnancy stage determined by completed weeks of gestation
[ ] B. Routine care during healing or recovery after active treatment
[ ] C. A Z code that describes a reason for care such as screening, counseling, or follow-up
[ ] D. A reaction occurring when a correctly prescribed drug is properly administered

12. Which description best matches “Underdosing”?

[ ] A. A residual effect remaining after the acute phase of an injury or condition
[ ] B. A Z code that describes a status such as device presence, dependence, history, or long-term therapy
[ ] C. Taking less medication than prescribed or instructed
[ ] D. An additional Z code used when applicable to identify the specific completed pregnancy week

13. Which description best matches “External cause”?

[ ] A. Chapter 15 pregnancy codes generally take sequencing priority when a condition complicates pregnancy

[ ] B. Supplemental information describing how, where, and during what activity an injury occurred

[ ] C. An additional code reported on the maternal record when delivery occurs

[ ] D. An event involving overdose, wrong substance, wrong route, or medication taken in error

14. Which description best matches “Encounter code”?

[ ] A. A Z code that describes a reason for care such as screening, counseling, or follow-up

[ ] B. A Z38 code used as the principal diagnosis on the newborn birth record

[ ] C. A reaction occurring when a correctly prescribed drug is properly administered

[ ] D. Pregnancy stage determined by completed weeks of gestation

15. Which description best matches “Health-status code”?

[ ] A. A condition present at birth, although it may be diagnosed later

[ ] B. Taking less medication than prescribed or instructed

[ ] C. An additional Z code used when applicable to identify the specific completed pregnancy week

[ ] D. A Z code that describes a status such as device presence, dependence, history, or long-term therapy
