Chapter 10 Exam

Evaluation and Management (E/M)

Name: _____ Date: _____

Score (instructor): _____ / 15

Choose the best answer for each question. Mark one choice per question. Each question is worth 1 point.

1. Which description best matches “New patient”?

[ ] A. The requirement that two of the three MDM elements meet or exceed the selected level for most applicable E/M families

[ ] B. An unrelated E/M service during a postoperative period

[ ] C. Conditions evaluated or managed during the encounter

[ ] D. A patient without qualifying professional services from the same specialty and group during the prior three years

2. Which description best matches “Established patient”?

[ ] A. A significant, separately identifiable E/M service on the date of another service

[ ] B. Qualifying tests, records, interpretation, or professional discussion

[ ] C. A patient who received qualifying services from the same specialty and group during the prior three years

[ ] D. Permitted physician or QHP work on the date of the encounter when the code family allows time selection

3. Which description best matches “Medical decision making”?

[ ] A. The risk of complications or morbidity from patient management

[ ] B. The E/M framework using problems, data, and risk

[ ] C. Time excluded from E/M total time when a separate procedure is reported

[ ] D. An E/M service resulting in the decision for major surgery

4. Which description best matches “Problems addressed”?

[ ] A. Conditions evaluated or managed during the encounter

[ ] B. A setting that does not distinguish new from established patients

[ ] C. A patient without qualifying professional services from the same specialty and group during the prior three years

[ ] D. The requirement that two of the three MDM elements meet or exceed the selected level for most applicable E/M families

5. Which description best matches “Data”?

[ ] A. Age- and gender-appropriate health assessment, counseling, and risk reduction

[ ] B. A patient who received qualifying services from the same specialty and group during the prior three years

[ ] C. Permitted physician or QHP work on the date of the encounter when the code family allows time selection

[ ] D. Qualifying tests, records, interpretation, or professional discussion

6. Which description best matches “Risk”?

[ ] A. The E/M framework using problems, data, and risk

[ ] B. Time excluded from E/M total time when a separate procedure is reported

[ ] C. The risk of complications or morbidity from patient management

[ ] D. Direct care of a critically ill or injured patient requiring high-complexity decision making

7. Which description best matches “Two-of-three rule”?

[ ] A. A setting that does not distinguish new from established patients

[ ] B. The requirement that two of the three MDM elements meet or exceed the selected level for most applicable E/M families

[ ] C. An unrelated E/M service during a postoperative period

[ ] D. Conditions evaluated or managed during the encounter

8. Which description best matches “Qualifying total time”?

[ ] A. Permitted physician or QHP work on the date of the encounter when the code family allows time selection

[ ] B. A significant, separately identifiable E/M service on the date of another service

[ ] C. Qualifying tests, records, interpretation, or professional discussion

[ ] D. Age- and gender-appropriate health assessment, counseling, and risk reduction

9. Which description best matches “Separately billed procedure time”?

[ ] A. An E/M service resulting in the decision for major surgery

[ ] B. The risk of complications or morbidity from patient management

[ ] C. Direct care of a critically ill or injured patient requiring high-complexity decision making

[ ] D. Time excluded from E/M total time when a separate procedure is reported

10. Which description best matches “Emergency department E/M”?

[ ] A. The requirement that two of the three MDM elements meet or exceed the selected level for most applicable E/M families

[ ] B. An unrelated E/M service during a postoperative period

[ ] C. A setting that does not distinguish new from established patients

[ ] D. A patient without qualifying professional services from the same specialty and group during the prior three years

11. Which description best matches “Preventive medicine”?

[ ] A. A significant, separately identifiable E/M service on the date of another service

[ ] B. Age- and gender-appropriate health assessment, counseling, and risk reduction

[ ] C. A patient who received qualifying services from the same specialty and group during the prior three years

[ ] D. Permitted physician or QHP work on the date of the encounter when the code family allows time selection

12. Which description best matches “Critical care”?

[ ] A. Direct care of a critically ill or injured patient requiring high-complexity decision making

[ ] B. The E/M framework using problems, data, and risk

[ ] C. Time excluded from E/M total time when a separate procedure is reported

[ ] D. An E/M service resulting in the decision for major surgery

13. Which description best matches “Modifier 24”?

[ ] A. Conditions evaluated or managed during the encounter

[ ] B. A setting that does not distinguish new from established patients

[ ] C. A patient without qualifying professional services from the same specialty and group during the prior three years

[ ] D. An unrelated E/M service during a postoperative period

14. Which description best matches “Modifier 25”?

[ ] A. Age- and gender-appropriate health assessment, counseling, and risk reduction

[ ] B. A patient who received qualifying services from the same specialty and group during the prior three years

[ ] C. A significant, separately identifiable E/M service on the date of another service

[ ] D. Qualifying tests, records, interpretation, or professional discussion

15. Which description best matches “Modifier 57”?

[ ] A. The E/M framework using problems, data, and risk

[ ] B. An E/M service resulting in the decision for major surgery

[ ] C. The risk of complications or morbidity from patient management

[ ] D. Direct care of a critically ill or injured patient requiring high-complexity decision making
