Chapter 12 Exam

Musculoskeletal Surgery

Name: _____ Date: _____

Score (instructor): _____ / 15

Choose the best answer for each question. Mark one choice per question. Each question is worth 1 point.

1. Which description best matches “Closed fracture treatment”?

[ ] A. Hardware placed within the body to stabilize bone
[ ] B. Treatment without surgically exposing the fracture site
[ ] C. Endoscopic examination or treatment within a joint
[ ] D. A code reported for each qualifying additional vertebral level with a primary procedure

2. Which description best matches “Open fracture treatment”?

[ ] A. Treatment that surgically exposes the fracture site
[ ] B. A surgical arthroscopy generally includes the diagnostic arthroscopy of the same joint
[ ] C. Graft tissue obtained from the same patient
[ ] D. A stabilization frame outside the body connected to bone by pins or wires

3. Which description best matches “Manipulation”?

[ ] A. Surgical repair or replacement of a joint
[ ] B. HCPCS modifiers identifying specific fingers or toes
[ ] C. Aspiration or injection of a joint or bursa
[ ] D. Reduction or realignment requiring physician-applied force

4. Which description best matches “Internal fixation”?

[ ] A. Treatment without surgically exposing the fracture site
[ ] B. Endoscopic examination or treatment within a joint
[ ] C. Hardware placed within the body to stabilize bone
[ ] D. Surgical restoration of a torn tendon

5. Which description best matches “External fixation”?

[ ] A. A surgical arthroscopy generally includes the diagnostic arthroscopy of the same joint
[ ] B. A stabilization frame outside the body connected to bone by pins or wires
[ ] C. Removal of vertebral lamina to decompress neural structures
[ ] D. Treatment that surgically exposes the fracture site

6. Which description best matches “Arthrocentesis”?

[ ] A. Aspiration or injection of a joint or bursa
[ ] B. Joining vertebral segments to eliminate motion
[ ] C. Reduction or realignment requiring physician-applied force
[ ] D. Surgical repair or replacement of a joint

7. Which description best matches “Arthroscopy”?

[ ] A. A code reported for each qualifying additional vertebral level with a primary procedure
[ ] B. Hardware placed within the body to stabilize bone
[ ] C. Surgical restoration of a torn tendon
[ ] D. Endoscopic examination or treatment within a joint

8. Which description best matches “Surgical arthroscopy rule”?

[ ] A. A stabilization frame outside the body connected to bone by pins or wires
[ ] B. Removal of vertebral lamina to decompress neural structures
[ ] C. A surgical arthroscopy generally includes the diagnostic arthroscopy of the same joint
[ ] D. Graft tissue obtained from the same patient

9. Which description best matches “Arthroplasty”?

[ ] A. Joining vertebral segments to eliminate motion
[ ] B. Surgical repair or replacement of a joint
[ ] C. HCPCS modifiers identifying specific fingers or toes
[ ] D. Aspiration or injection of a joint or bursa

10. Which description best matches “Tendon repair”?

[ ] A. Surgical restoration of a torn tendon
[ ] B. Treatment without surgically exposing the fracture site
[ ] C. Endoscopic examination or treatment within a joint
[ ] D. A code reported for each qualifying additional vertebral level with a primary procedure

11. Which description best matches “Laminectomy”?

[ ] A. Treatment that surgically exposes the fracture site
[ ] B. A surgical arthroscopy generally includes the diagnostic arthroscopy of the same joint
[ ] C. Graft tissue obtained from the same patient
[ ] D. Removal of vertebral lamina to decompress neural structures

12. Which description best matches “Spinal fusion”?

[ ] A. Surgical repair or replacement of a joint
[ ] B. HCPCS modifiers identifying specific fingers or toes
[ ] C. Joining vertebral segments to eliminate motion
[ ] D. Reduction or realignment requiring physician-applied force

13. Which description best matches “Add-on spinal level”?

[ ] A. Treatment without surgically exposing the fracture site
[ ] B. A code reported for each qualifying additional vertebral level with a primary procedure
[ ] C. Hardware placed within the body to stabilize bone
[ ] D. Surgical restoration of a torn tendon

14. Which description best matches “Autograft”?

[ ] A. Graft tissue obtained from the same patient
[ ] B. A stabilization frame outside the body connected to bone by pins or wires
[ ] C. Removal of vertebral lamina to decompress neural structures
[ ] D. Treatment that surgically exposes the fracture site

15. Which description best matches “Digit modifiers”?

[ ] A. Aspiration or injection of a joint or bursa
[ ] B. Joining vertebral segments to eliminate motion
[ ] C. Reduction or realignment requiring physician-applied force
[ ] D. HCPCS modifiers identifying specific fingers or toes
